

Item code: VICAM-AMS-RADAR

REVERSING RADAR

Secure the zones behind you with our high performance reversing radar!

The reversing radar, alone or in addition to a reversing camera, allows you to be alerted to the presence of an obstacle in the zone behind your vehicle. Our **high performance reversing radar** is able to detect objects or people **up to 20m thanks to its sensor**. This wide reach allows you to **secure risk areas** such as construction sites or agricultural land. With its **audible warning**, you are warned from your cabin of a possible danger.

Features :

- Liquid/solid protection rating: Sensor IP69K - Control unit : IP66
- Detection range: 0.1 to 20m
- Up to 5 detection zones
- Detects moving objects: vehicles, motorcycles, bicycles, pedestrians, etc.
- Detects objects even when visibility is limited:
during darkness and in smoke, fog and dust
- The use of a video system is recommended (camera + screen)
- Configure and update via an app
- Included in this kit: a control box, an audible warning and a sensor.
- Power supply : 10 to 32V DC

REVERSING RADAR

**Recommended use with a rear view system
(camera + screen) ***

Once installed, our system provides you with visual and audible indications as soon as an obstacle enters the detection area. This area is visible directly from your screen and is divided into 5 ranges going from red to green, depending on the proximity to your machine. Red being the detection range closest to your vehicle and green being the farthest. In addition to this visual warning, an audible warning will also help you, the closer the obstacle approaches your vehicle, the more the audible warning will intensify in your cabin.

*This product is compatible with all our video kits
