

SAFETY LIGHTING : FORKLIFT

• SAFETY LIGHT

Secure the perimeter around your forklift!

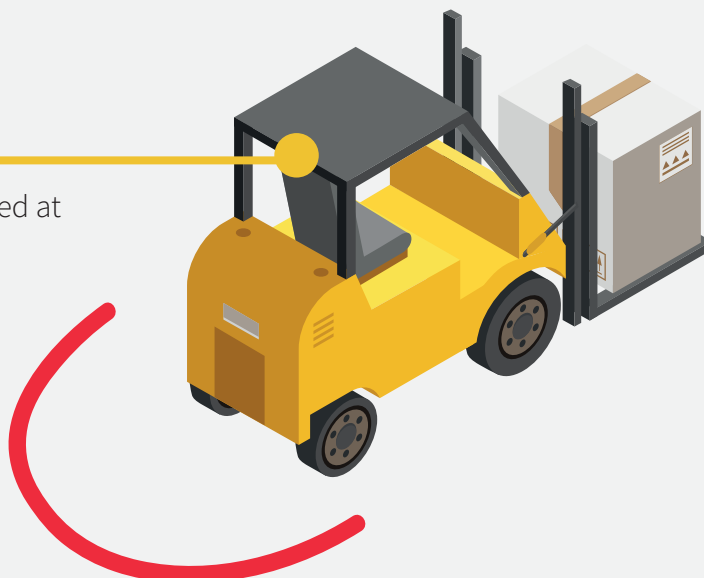

The LIGHT-FORKLIFT safety light projects a red luminous arc on the ground to delimit a safety area around all handling equipment. This device helps the user to prevent injuries and collisions.

Features :

- Protection rating against solids and liquids : IP68
- Operating temperature : -45°C à +85°C
- Fixing: screws
- Dimensions : 128.5x120x92 mm

Safety light to be installed at the rear of the vehicle

SAFETY LIGHTING : FORKLIFT

• POWER SOURCE

- 1 - Connect the red cable to the “+” and the black cable to the “-”. Choose a power supply on ignition connections (e.g.: headlights). The product only lights up when the vehicle is working.
- 2 - Check the voltage (DC12v / 24V)
